

Dynamic Planning

Because space planning once a year, for a workforce that changes every week, is never going to work.

Slow and manual before hybrid. Impossible since.

Until now.

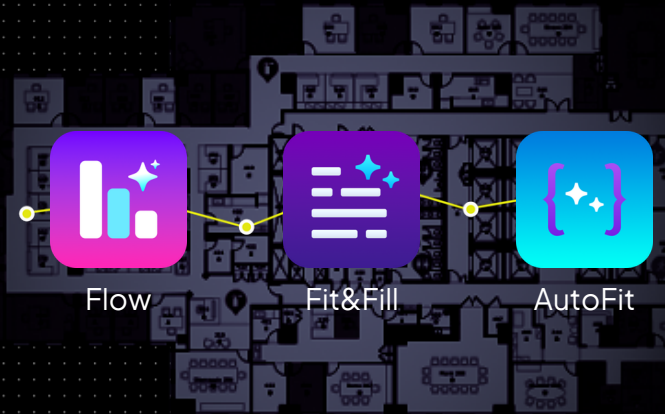

The process hasn't changed in decades – the world around it has. Reposition CRE from cost center to value creator by shifting from periodic, manual planning to continuous, intelligent planning and execution.

Core capabilities

The only end-to-end strategic planning tool. Model demand → automate allocations → run scenarios → operationalize your plan.

- ✓ **Always-on demand modeling**
Replace manual business unit forecasting on spreadsheets with a living model of employee demand
- ✓ **Automated stacking & blocking**
Fit demand to your floorplans and optimize allocations in a click, while controlling the level of disruption
- ✓ **Intelligent scenario planning**
Wondering what happens if you change your hybrid policy or adjust allocations? Run scenarios in seconds to find out

Strategic outcomes

Set a whole new operating rhythm for occupancy management that keeps up with today's pace of change.

- ✓ **Answer the big questions**
No more guesswork: know how much space you need, where, no matter how fast things change
- ✓ **Align stakeholders**
At last – a clear picture of current reality and future scenarios that everyone can understand
- ✓ **Shed the tech noise**
Automate the complexity with one platform
